DETAILED ACTION

Claims 52-58 are pending in the case.

Receipt of the Information Disclosure Statement on 5/25/05 is acknowledged.

Response to Amendment

Any rejection of record in the previous action not addressed in this office action is withdrawn. There are no new grounds of rejection that were not necessitated by applicants' amendment and therefore, this action is final.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 52-58 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not provide support for the invention as now claimed: the recited concentrations (i.e. from 0.5 uM to 1000 uM of metal ion chelator, ethanol at a weight to volume concentration from 0.5% to 2.5%, a buffer in the pH range from 7.0 to 9.5, at a concentration from about 0.5 mM to about 50 mM, a salt at a concentration from 50mM to 300mM (claim

52), Tris-HCl at pH from 7.0 to 9.5, ethanol from 0.5% to 2.5% w/v, EDTA in a concentration up to 5mM, and NaCl at a concentration from 50mM to 300mM (claim 53), NaCl concentration from 100mM to 200mM (claim 54), EDTA "at a concentration up to 500uM" (claim 55), ethanol "at a concentration from 1% to 2%" (claim 56), EDTA at a concentration from 0.5uM – 500uM (claim 57). These particular ranges are not disclosed in the specification or claims as originally filed. The specification does not provide sufficient blazemarks nor direction for the instant methods encompassing the above-mentioned limitations, as currently recited. The instant claims now recite limitations which were not clearly disclosed in the specification as-filed, and now change the scope of the instant disclosure as-filed. Such limitations recited in the present claims, which did not appear in the specification, as filed, introduce new concepts and violate the description requirement of the first paragraph of 35 U.S.C. 112.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1636

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
